---

## SUMMARY

Computer Science undergraduate (Parul University, 2027) with a strong foundation in scalable systems, AI-powered SaaS, and high-performance 3D web engineering. Proficient in Python, TypeScript, and JavaScript with hands-on experience in Machine Learning and Data Structures & Algorithms (350+ problems solved). Independently shipped multiple production products including award-winning 3D web experiences and full-stack SaaS platforms. Brings a rare combination of engineering depth, systems thinking, and design sensibility.

---

## TECHNICAL SKILLS

**Languages:** Python · TypeScript · JavaScript · Java · C++

**Frontend:** React · Next.js · TailwindCSS · Three.js · GSAP · WebGL · Vite

**Backend:** Node.js · REST APIs · MySQL · MongoDB · Puter.js (Serverless) · Linux

**AI / Cloud:** Machine Learning · NLP · Claude API · Gemini AI · AWS · CI/CD · Vercel · Netlify

**Core CS:** Data Structures · Algorithms · System Design · OOP · Operating Systems · Computer Networks

---

## EXPERIENCE

**Software Engineering Virtual Experience** — Goldman Sachs (Forage)2024 · Remote [Goldman Sachs](#)

- ▶ Designed and implemented secure backend APIs for financial transaction systems applying enterprise-level authentication and authorization patterns.
- ▶ Built and optimized data pipelines processing large-scale structured datasets, improving processing throughput by ~35%.

**Software Engineering Virtual Experience** — Electronic Arts (Forage)2024 · Remote [EA Certificate](#)

- ▶ Optimized performance-critical system components using algorithmic improvements, reducing simulation overhead in real-time environments.
- ▶ Refactored codebase using SOLID design principles, improving maintainability and reducing technical debt significantly.

---

## PROJECTS

**High-Performance 3D Web Applications** *Three.js · GSAP · WebGL · TypeScript · Vite*

- ▶ Human Evolution [Preview](#) Award-winning immersive 3D evolutionary timeline; recreated and extended with enhanced visual fidelity.
- ▶ Farbe [Preview](#) — Original cinematic 3D film photography experience with scroll-driven animations and dynamic color grading.
- ▶ Nimbus [Preview](#) — Atmospheric 3D environment featuring custom shaders and GPU-optimized real-time rendering pipeline.
- ▶ MOJITO [Preview](#) — Original 3D product showcase with physics-based animations and immersive scroll-jacking.
- ▶ Achieved consistent 60fps across all projects via optimized asset pipelines, lazy loading, and draw call reduction.

**Roomify — AI Floor Plan to 3D Model SaaS** [Preview](#) · React · TypeScript · Vite · TailwindCSS · Puter.js · Claude API · Gemini AI

- ▶ Engineered an end-to-end SaaS platform that converts 2D floor plans into fully-rendered interactive 3D models in seconds — zero human intervention required.
- ▶ Integrated Claude and Gemini AI via Puter.js serverless infrastructure (KV database, file storage, hosted AI models); multi-tenant architecture with RESTful API layer.

**ResuMind — AI Resume Analyzer SaaS** [Preview](#) · React · TypeScript · Vite · TailwindCSS · Puter.js · React Router v7 · Zustand

- ▶ NLP-powered resume scoring engine via Claude AI through Puter.js — no backend required; Zustand global state management with React Router v7.
- ▶ Automated ~70% of manual screening workflows; sub-second API response times with modular, horizontally scalable architecture.

**Hospital Management System** · Python · MySQL · System Design

- ▶ Reduced administrative processing time by 80% (5–7 min to under 30 sec) through algorithmic redesign and optimized SQL query architecture.

---

## EDUCATION & CERTIFICATIONS

**B.Tech — Computer Science & Engineering** *Expected: 2027*

Parul University, Vadodara, Gujarat · Diploma — Native Android Development (CGPA: 8.9)

**Certifications:** [AWS Cloud Foundations](#) · [Python Expert — Infosys](#) · [Smart Coder](#) · [Unstop Hackathon](#)

---
